Short description

Currently I work as a chief editor for the Swiss Journal of Palaeontology and Swiss Journal of Geosciences. Every second year I hold a 4 hrs lecture "Introduction to Palaeontology" at the University of Basel. In 2018 I also held the lecture "Historical Geology" at the University of Fribourg.

From 2000-2017 I was working as a Research Palaeontologist at the *Paléontologie A16* (Office de la culture, Canton Jura, Switzerland), a palaeontological service, which was in charge of the excavation, documentation, and safeguarding of palaeontological heritage along the future course of Swiss federal Highway A16. I was responsible for the excavation, documentation, and (coordination of) scientific research of dinosaur footprint sites that were uncovered prior to the construction of Highway A16. I'm still involved in research projects related to these dinosaur footprint discoveries in collaboration with researchers from Europe and abroad.
